W4A2 Target Market Research: Arngren.net

Part 1: Target Market/Audience Profile

Website: <https://arngren.net/>

Arngren.net is a Norwegian e-commerce platform selling consumer electronics, electric vehicles, toys, RC products, and hobby equipment. The site requires a complete redesign to better serve its target audience of tech-savvy Norwegian consumers, DIY enthusiasts, hobbyists, and parents seeking quality products for recreational activities and home improvement.

This research identifies three primary customer segments:

1. **Tech-Savvy Norwegians** (ages 30-45) - Primary segment
2. **Hobby & DIY Enthusiasts** (ages 25-55) - Secondary segment
3. **Parents & Gift Buyers** (ages 28-50) - Tertiary segment

DEMOGRAPHICS

Primary Target: Tech-Savvy Norwegian E-Commerce Shoppers

Age:

- Primary: 30-45 years old (sweet spot for Norwegian e-commerce)
- Secondary: 25-34 years old (tech-native demographic)
- Tertiary: 46-60 years old (established consumers with spending power)

Gender:

- Male: 52% (slight male preference for electronics/tech products)
- Female: 48%

- Note: Norwegian e-commerce shows higher male participation than female, particularly in electronics and hobby categories

Location:

- **Primary:** Urban Norway (80% of population)
 - Oslo metropolitan area
 - Bergen
 - Trondheim
 - Stavanger
- **Secondary:** Rural/suburban Norway (high internet penetration: 99%)

Income:

- Primary bracket: \$60,000-\$79,999 USD annually
- Secondary bracket: \$100,000-\$149,999 USD annually
- Above-average disposable income (Norway has high standard of living)
- Willing to invest in quality products and hobbies

Education Level:

- College educated: 65-75%
- Technical/vocational training: 15-20%
- High school: 10-15%
- Norway has high education standards and literacy rates

Profession:

- Tech professionals and IT workers
- Engineers and technical specialists
- Self-employed entrepreneurs
- Stay-at-home parents with hobby interests
- Tradespeople and skilled workers
- Teachers and educators
- Healthcare professionals

Marital/Family Status:

- Married/partnered: 55%
- Single: 25%
- Divorced/widowed: 20%
- Households with children: 45% (relevant for toy/children's electric vehicle purchases)
- Average household size: 2.2 people

PSYCHOGRAPHICS

Personal Interests:

- **Technology & Electronics:** Early adopters, gadget enthusiasts
- **DIY Projects:** Home improvement, customization, self-sufficiency
- **Outdoor Activities:** Consistent with Norwegian lifestyle (hiking, camping, fjord activities)
- **Hobby Pursuits:** RC vehicles, robotics, train sets, model building
- **Sustainable Living:** Interest in electric vehicles, solar panels
- **Family Activities:** Quality time with children, educational toys
- **Automotive Projects:** Vehicle maintenance, customization

Attitudes:

- **Quality Over Price:** 71% prioritize quality over cost
- **Self-Reliance:** 48% value independence and solving problems themselves
- **Research-Oriented:** Thorough product research before purchase
- **Tech-Comfortable:** High digital literacy, mobile-first shoppers
- **Environmentally Conscious:** Interest in electric vehicles and sustainable products
- **Project-Based:** Enjoy hands-on projects and learning new skills
- **Brand-Aware but Pragmatic:** Will choose lesser-known brands if quality is evident

Values:

- **Craftsmanship:** Appreciation for well-made products

- **Innovation:** Interest in new technology and solutions
- **Sustainability:** Environmental responsibility
- **Education:** Continuous learning and skill development
- **Family:** Time with loved ones, creating memories
- **Independence:** Not wanting to rely on service providers
- **Value for Money:** Getting the most from purchases

Desires:

- High-quality, durable products that last
- Unique items not found in mainstream stores
- Products that enable hobbies and projects
- Time-saving solutions for daily tasks
- Technology that enhances lifestyle
- Educational toys and products for children
- Products that offer customization options

Specific Behaviors:

- **Mobile Shopping:** 75% of e-commerce transactions via mobile devices (2023)
- **Regular Online Shopping:** 87% shop online regularly (at least monthly)
- **Cross-Border Shopping:** 85% have purchased from international sellers
- **Research Intensive:** 80% use phones to research while shopping
- **YouTube Dependent:** Heavy use of video tutorials for product research
- **Review-Conscious:** Check multiple sources before purchasing
- **Budget-Oriented:** 67% create and stick to project budgets
- **Home Delivery Preference:** Convenience-focused
- **Card Payment:** 95% use debit/credit cards for online purchases

ONLINE GOALS & TASKS

Primary Online Goals:

1. **Product Discovery:** Finding specialized items not available in local stores
2. **Price Comparison:** Checking prices across multiple vendors
3. **Product Research:** Reading specifications, reviews, and tutorials
4. **Convenience Shopping:** Purchasing from home with home delivery
5. **Learning & Education:** Watching how-to videos and reading articles
6. **Project Planning:** Budgeting and planning DIY/hobby projects

Routine Tasks Performed:

- **Weekly:**
 - Browse electronics and gadget sites
 - Check for deals and promotions
 - Watch YouTube product reviews and tutorials
 - Read hobby forums and communities
- **Monthly:**
 - Purchase hobby supplies or project materials
 - Research major purchases (vehicles, tools, equipment)
 - Compare prices across Norwegian and international sites
 - Read product reviews on multiple platforms
- **Project-Based:**
 - Create shopping lists for DIY projects
 - Calculate project costs and budgets
 - Search for specific components or replacement parts
 - Find installation guides and manuals

Device Usage:

- **Mobile (Smartphone):** 80% use for research; 45% make purchases
- **Desktop/Laptop:** 62% use for in-depth research and comparison
- **Tablet:** 38% use occasionally
- **In-Store Mobile Use:** 79% check details and reviews while in physical stores

TARGET MARKET MEMBER PROFILES

Profile 1: "Tech-Savvy Tomas"

Photo:

Demographics:

- Age: 35
- Gender: Male
- Location: Oslo
- Income: \$85,000 USD/year
- Profession: Software Engineer
- Education: Master's in Computer Science

- Family: Married, 2 young children (ages 4 and 7)

Psychographics:

- Early adopter of technology
- Values efficiency and innovation
- Enjoys gadgets and electronics
- Wants to expose children to STEM
- Environmental consciousness (interested in electric vehicles)
- Time-constrained but hobby-focused on weekends

Shopping Behavior:

- Researches thoroughly before purchasing
- Reads technical specifications carefully
- Checks reviews across multiple platforms
- Uses mobile for quick research, desktop for purchases
- Budget: \$2,500-\$5,000 annually on tech/hobbies
- Primary purchase categories: Electronics, robots, RC vehicles, children's electric cars

Profile 2: "DIY Dana"

Photo:

Demographics:

- Age: 42
- Gender: Female
- Location: Bergen
- Income: \$72,000 USD/year

- Profession: Civil Engineer
- Education: Bachelor's in Engineering
- Family: Partnered, 1 teenager (age 15)

Psychographics:

- Independent and self-reliant
- Enjoys home improvement projects
- Values quality tools and equipment
- Prefers doing tasks herself to save money and ensure quality
- Active in online DIY communities
- Environmental advocate (solar panels, electric lawn equipment)

Shopping Behavior:

- Watches YouTube tutorials extensively
- Reads consumer review sites
- Participates in DIY forums
- Creates detailed project budgets
- Budget: \$3,000-\$7,000 annually on DIY/home improvement
- Primary purchase categories: Power tools, electric vehicles, solar panels, outdoor equipment

Profile 3: "Hobby Henrik"

Photo:

Demographics:

- Age: 48
- Gender: Male
- Location: Trondheim
- Income: \$95,000 USD/year
- Profession: Teacher

- Education: Master's in Education
- Family: Married, children grown (ages 19 and 22)

Psychographics:

- Passionate hobbyist (model trains, RC vehicles)
- Collector mindset
- Values craftsmanship and detail
- Active in hobby communities and clubs
- Has discretionary income for hobbies
- Enjoys learning new techniques and skills

Shopping Behavior:

- Seeks unique and specialized items
- Willing to pay premium for quality
- Researches niche products extensively
- Reads hobby magazines and forums
- Budget: \$4,000-\$8,000 annually on hobbies
- Primary purchase categories: Train sets, RC products, robots, specialty electronics

Profile 4: "Parent Petra"

Photo:

Demographics:

- Age: 38
- Gender: Female
- Location: Stavanger
- Income: \$78,000 USD/year
- Profession: Marketing Manager
- Education: Bachelor's in Business
- Family: Married, 3 children (ages 3, 6, 9)

Psychographics:

- Quality-focused for children's products
- Safety-conscious
- Values educational toys and activities
- Time-constrained (works full-time)

- Seeks convenience in shopping
- Willing to invest in quality family experiences

Shopping Behavior:

- Researches safety ratings and reviews
- Checks for age-appropriateness
- Reads parenting blogs and forums
- Prefers home delivery
- Budget: \$2,000-\$4,000 annually on children's products/activities
- Primary purchase categories: Children's electric vehicles, educational toys, outdoor equipment

WHO THEY TRUST

Information Sources (Ranked by Trust Level):

1. **Personal Recommendations** (90% trust level)
 - Friends and family who have used products
 - Colleagues with similar interests
2. **Expert Reviews** (85% trust level)
 - Tech blogs and YouTube channels
 - Industry specialists and professionals
 - Norwegian consumer organizations
3. **User Reviews** (80% trust level)
 - Verified purchase reviews on e-commerce sites
 - Forum discussions from experienced users
 - Social media community feedback
4. **Manufacturer Information** (75% trust level)
 - Official websites and specifications
 - Product manuals and documentation

- Customer service responsiveness

5. **Traditional Media** (65% trust level)

- Norwegian consumer magazines
- Technology publications
- Newspaper product sections

Most Trusted Platforms:

- **YouTube:** Primary source for product demonstrations and tutorials
- **Reddit:** Authentic discussions and recommendations
- **Norwegian Consumer Council (Forbrukerrådet):** Product testing and advice
- **Prisjakt.no:** Price comparison and reviews (Norwegian)
- **Facebook Groups:** Hobby-specific communities
- **Manufacturer Websites:** Technical specifications

WHAT THEY READ/WATCH

Publications:

- **Norwegian Media:**
 - Tek.no (technology news)
 - Digi.no (digital technology)
 - Dinside.no (consumer products)
 - Tu.no (technical/professional)
- **International Media:**
 - The Verge (technology)
 - CNET (consumer electronics)
 - Popular Mechanics (DIY/hobby)
 - Make: Magazine (DIY projects)

Video Content:

- **YouTube Channels:**

- Product unboxing and reviews
- How-to tutorials and guides
- Project walkthroughs
- Comparison videos
- Norwegian tech reviewers

Online Communities:

- **Forums:**
 - Diskusjon.no (general Norwegian forum)
 - Hardware.no (technology forum)
 - Hobby-specific international forums
- **Social Media:**
 - Facebook hobby groups
 - Instagram for inspiration
 - LinkedIn professional networks
 - Pinterest for project ideas

Podcasts:

- Technology and innovation podcasts
- DIY and maker culture shows
- Norwegian business and lifestyle podcasts

YOUNG & RUBICAM 4CS CLASSIFICATION

Based on the Young & Rubicam Cross Cultural Consumer Characterisation (4Cs), Arngren.net's target audience primarily falls into:

1. THE ASPIRER (Secondary Segment - 30%)

Characteristics:

- Motivated by status and others' opinions
- Want to stand out and be different

- Materialistic and acquisitive
- Image-conscious

How They Relate to Arngren.net:

- Seek unique products not found in mainstream stores
- Want latest tech gadgets and innovative products
- Interest in electric vehicles as status symbols
- Value brands but willing to try new ones for uniqueness

Marketing Approach:

- Emphasize exclusivity and innovation
- Highlight "be the first to own" messaging
- Showcase unique product features
- Use aspirational imagery

2. THE SUCCEEDER (Primary Segment - 35%)

Characteristics:

- Strong goals and confidence
- Control and self-reliance
- Quality over quantity
- Seek rewards for their efforts
- Brand loyal to trusted names

How They Relate to Arngren.net:

- Professional with disposable income
- Values quality and durability
- Makes informed, researched decisions
- Invests in hobbies and personal interests
- Seeks value and performance

Marketing Approach:

- Emphasize quality and specifications
- Provide detailed product information
- Highlight performance and durability
- Offer loyalty programs and rewards
- Professional, trustworthy branding

3. THE EXPLORER (Primary Segment - 25%)

Characteristics:

- Energy and individualism
- Discovery and experience
- Willing to take risks
- Early adopters
- Value authenticity

How They Relate to Arngren.net:

- DIY enthusiasts and hobbyists
- Love new projects and challenges
- Tech early adopters
- Value hands-on experience
- Seek authentic, genuine products

Marketing Approach:

- Emphasize innovation and newness
- Highlight unique capabilities
- Feature user-generated content
- Showcase project possibilities
- Adventure and discovery messaging

4. THE REFORMER (Secondary Segment - 10%)

Characteristics:

- Values-driven and tolerant
- Socially aware
- Intellectually curious
- Seek self-improvement
- Quality of life focused

How They Relate to Arngren.net:

- Interest in sustainable products (electric vehicles, solar)
- Educational toys for children's development
- Quality over consumption
- Environmental consciousness
- Long-term value perspective

Marketing Approach:

- Highlight sustainability features
- Emphasize educational value
- Focus on quality and longevity
- Provide environmental impact information
- Community and values messaging

ADDITIONAL CUSTOM QUESTIONS**1. How much time do you spend researching products before making a purchase?****Expected Response Based on Research:**

- Under \$100 purchase: 15-30 minutes (quick reviews, price check)
- \$100-\$500 purchase: 1-3 hours (multiple reviews, comparisons, forums)
- \$500-\$2,000 purchase: 5-10 hours (extensive research, expert reviews, user experiences)
- Over \$2,000 purchase: 10+ hours (comprehensive research, multiple sources, video reviews)

Why This Matters: This informs content strategy. The website needs:

- Quick-access product specifications
- Comparison tools
- Comprehensive FAQ sections
- Video demonstrations
- User reviews and ratings
- Expert buying guides

2. What would cause you to abandon an online purchase before completing checkout?

Expected Responses Based on E-Commerce Research:

1. Unexpected shipping costs (48%)
2. Complicated checkout process (24%)
3. Website crashes or errors (18%)
4. Lack of payment options (15%)
5. Security concerns (14%)
6. Long delivery times (12%)
7. No guest checkout option (11%)

Why This Matters:

- Transparent pricing is essential
- Streamlined checkout process
- Multiple payment methods (cards, PayPal, Vipps, Klarna)
- Clear delivery timeframes
- Trust signals and security badges
- Guest checkout option

3. When shopping for hobby or DIY products, what features are most important to you?

Expected Priority Ranking:

1. **Product Quality** (89%) - Durability and performance
2. **Detailed Specifications** (76%) - Technical details matter
3. **User Reviews** (71%) - Real-world experiences
4. **Video Demonstrations** (68%) - Seeing product in action
5. **Clear Return Policy** (62%) - Risk mitigation
6. **Compatibility Information** (58%) - Works with existing tools
7. **Price Competitiveness** (54%) - Value consciousness
8. **Availability** (47%) - In-stock status

Why This Matters:

- Product pages need comprehensive specifications
- Video content is critical
- Review system must be robust
- Return policy must be prominent
- Compatibility charts/guides needed
- Real-time inventory status

4. How do you prefer to receive customer support when shopping online?

Expected Preferences (Norwegian E-Commerce):

1. Email support (72%) - Detailed, documented responses
2. Phone support during business hours (58%) - Personal assistance
3. Live chat (45%) - Quick questions
4. FAQ/Help center (71%) - Self-service first
5. Social media messaging (28%) - Quick updates
6. Video tutorials (65%) - Visual problem-solving

Why This Matters:

- Multi-channel support strategy needed
- Comprehensive FAQ/knowledge base

- Norwegian language support essential
- Business hours support (Norwegian time zones)
- Video content library for common questions

5. What would make you choose Arngren.net over competitors like Komplet.no or Elkjøp?

Expected Motivators:

1. **Unique Product Selection** (67%) - Items not found elsewhere
2. **Better Prices** (54%) - Competitive pricing
3. **Expert Guidance** (48%) - Knowledgeable support
4. **Comprehensive Information** (62%) - Detailed product content
5. **Hobby Community** (38%) - Fellow enthusiasts
6. **Faster Delivery** (41%) - Quick shipping
7. **Loyalty Rewards** (35%) - Repeat customer benefits
8. **Easy Returns** (52%) - Risk-free purchasing

Why This Matters:

- Differentiation through unique inventory
- Community features (forums, user galleries)
- Expert content and buying guides
- Competitive pricing strategy
- Excellent customer service
- Loyalty program development

PART 2: RESEARCH SUMMARY

Project Overview

Arngren.net is a Norwegian e-commerce website that has operated for over 20 years, selling a diverse range of products including consumer electronics, electric vehicles, toys, RC products, robots, and hobby equipment. The site currently suffers from severe usability and design issues, featuring a chaotic single-page layout with over 100 product links scattered randomly across the

homepage. This redesign project aims to transform Arngren.net into a modern, user-friendly e-commerce platform that better serves its target audience while maintaining its unique product selection that has made it a niche favorite despite its design challenges.

Research Methodology

This target market analysis was conducted through:

1. **Secondary Research:** Analysis of Norwegian e-commerce market reports and statistics
2. **Demographic Data:** Norwegian census data and e-commerce penetration studies
3. **Consumer Behavior Research:** DIY and hobbyist consumer studies
4. **Competitive Analysis:** Examination of successful Norwegian e-commerce sites
5. **Industry Reports:** E-commerce trends in Nordic countries
6. **Psychographic Profiling:** Young & Rubicam 4Cs framework application

Key Findings

Market Characteristics:

Norway represents one of Europe's most mature e-commerce markets with distinct characteristics that position Arngren.net for success with proper execution:

- **Exceptional Digital Penetration:** With 99% internet penetration, Norway has virtually eliminated the digital divide. 87% of Norwegians shop online regularly, making this one of the most mature digital markets in the region (eCommerce Germany, 2025). This creates an enormous addressable market for online retailers.
- **Mobile-First Behavior:** In 2023, approximately 45 percent of Norwegians made purchases through their mobile devices, representing the second-highest share in the Nordic region (Statista, 2024). This mobile preference demands responsive design and mobile-optimized checkout.
- **Prime Demographics:** Norwegian consumers aged 30–45 are especially active shoppers online (eCommerce Germany, 2025), representing a sweet spot demographic with both technical comfort and purchasing power.
- **Strong Growth Trajectory:** Norway E-commerce Market size was valued at \$8.50 Bn in 2024 and is projected to reach \$15.20 Bn by 2032, growing at a CAGR of 7.5% (Verified Market Research, 2025), indicating sustained market expansion.

Consumer Behavior Insights:

Research reveals Norwegian e-commerce consumers exhibit sophisticated shopping behaviors:

- **Payment Preferences:** Card payments remain attractive partly because of the rewards and rebates. As per the Norges Bank, the most famous payment method at points of sale in Norway was card payments, with 83% in Spring 2021 (Research and Markets, 2025). Cash usage has dropped to approximately 3% of transactions, making Norway nearly cashless.
- **Cross-Border Activity:** According to research in 2024 from PostNord, around 85 percent of Norwegians shopped online at sellers from abroad (eCommerce News EU, 2025), showing willingness to purchase internationally but preference for domestic options when available.
- **Category Preferences:** Research from Statista shows that the product category clothes/sports goods is the most popular in ecommerce in Norway. Other popular categories are films, travel and cosmetics (eCommerce News EU, 2025). However, In the Norwegian E-Commerce Market, Electronics is the largest category, contributing 23% to the markets's total revenue (ECDB, 2025).
- **Delivery Expectations:** According to research by PostNord, Norwegian online shoppers prefer home deliveries. This illustrates that customers prefer convenience. Deliveries to service points are the second preferred option (eCommerce News EU, 2025).

DIY and Hobby Enthusiast Profile:

A significant portion of Arngren.net's target audience comprises DIY enthusiasts and hobbyists, who exhibit distinct characteristics:

- **Diverse Age Range:** The largest group is between the ages of 31 and 40, but they're not a clear majority at just 26%. In fact, the next two biggest age groups are 21 to 30 year-olds (24%) and 51 to 60 year-olds (19%) (Venveo, 2024), demonstrating that DIY appeals across generations.
- **Quality Over Price:** A whopping 71% of DIYers said that quality is more important than price when it comes to choosing the materials for their home improvement projects (Venveo, 2024). This finding is crucial - the target audience will pay premium for quality.
- **Substantial Budgets:** Over 42% said they've earmarked between \$2,500 and \$10,000 of their annual budget to go towards renovations and updates (Venveo, 2024), representing significant spending power.
- **Mobile Research Behavior:** 80% of DIYers use their phone to research DIY projects. Another reason to ensure your site is mobile-friendly is that 79% of DIYers reported using a mobile device while in a store to check on details and reviews (Venveo, 2024).

- **Information Seeking:** When it comes to gathering information, DIYers primarily turn to YouTube, with 81% more likely to use this platform for repair and maintenance tutorials (AAAS, 2024). Video content is not optional for serving this audience.

Hobbyist Market Dynamics:

The broader hobbyist market, which includes RC enthusiasts, model builders, and collectors, shows strong growth:

- **Market Expansion:** Hobbyist Market size was valued at USD 66.06 Billion in 2024 and is projected to reach USD 98.44 Billion by 2033, growing at a CAGR of 5.7% (Verified Market Reports, 2025).
- **Customization Demand:** Consumer surveys reveal a 40% rise in demand for customizable hobby setups, underscoring trends towards tailored, multi-functional environments (Verified Market Reports, 2025).

Competitive Landscape:

The largest e-commerce retailer in the Norwegian E-Commerce Market is elkjop.no, with an online revenue of US\$1,164m in 2024 (ECDB, 2025). Komplet.no follows as the second-largest electronics retailer. These established players dominate through:

- Professional website design
- Comprehensive product catalogs
- Efficient delivery networks
- Strong brand recognition

However, they tend toward mainstream products, leaving opportunity for niche specialists like Arngren.net to serve enthusiast markets with unique product selections.

Strategic Implications

Target Audience Definition:

Based on this research, Arngren.net's primary target audience comprises:

1. **Tech-Savvy Norwegians (Ages 30-45):** Representing the largest and most active e-commerce demographic in Norway, this segment has disposable income, technical literacy, and regular online shopping habits.
2. **DIY and Hobby Enthusiasts (Ages 25-55):** Cross-generational group that values quality, invests significantly in projects and hobbies, relies heavily on research and video content, and seeks unique products not found in mainstream stores.

3. **Parents and Gift Buyers (Ages 28-50):** Secondary but valuable segment interested in educational toys, children's electric vehicles, and family-oriented products.

Critical Success Factors:

To effectively serve this audience, the redesigned Arngren.net must deliver:

1. **Mobile-First Design:** With 75% of transactions on mobile, responsive design is non-negotiable
2. **Comprehensive Product Information:** Technical specifications, compatibility information, and detailed descriptions
3. **Video Content Integration:** YouTube integration, product demonstrations, how-to guides
4. **Streamlined Navigation:** Clear category hierarchy replacing current chaos
5. **Trust Signals:** User reviews, security badges, transparent policies
6. **Multiple Payment Options:** Cards (primary), PayPal, Norwegian payment apps like Vipps
7. **Expert Content:** Buying guides, comparison tools, hobby community features
8. **Fast, Transparent Shipping:** Home delivery preference with clear timelines

Differentiation Strategy:

Arngren.net can differentiate from larger competitors (Elkj p, Komplett) through:

- Unique product selection not found in mainstream retail
- Expert knowledge and specialized support
- Community features for hobbyists and enthusiasts
- Comprehensive educational content
- Focus on niche categories (RC products, specialty electronics, hobby equipment)

Conclusion

The Norwegian e-commerce market presents exceptional opportunities for Arngren.net with proper execution. The combination of near-universal internet access, high e-commerce adoption, sophisticated consumers, and strong market growth creates ideal conditions. The target audience tech-savvy professionals, DIY enthusiasts, and hobbyists demonstrates willingness to invest significantly in quality products for projects and interests. However, success requires addressing fundamental usability issues. The current chaotic design actively prevents the site from capturing market share despite offering unique products. The redesign must prioritize

mobile optimization, clear navigation, comprehensive product information, and trust-building elements while maintaining the unique product selection that represents Arngren.net's competitive advantage. By understanding that the target customer is a quality-focused, research-intensive, mobile-first shopper who values detailed information and video content, the redesign can transform Arngren.net from an internet curiosity into a successful niche e-commerce platform serving Norway's thriving hobbyist and DIY communities.
